This webinar will be an advanced discussion of the triennial Medicare Occupational Mix Survey, including data requirements, impacts on the wage index and strategies around accurate and compliant reporting. Presented by Ryan Sader. The next survey is due July 1, 2020 which will use payroll and contract labor data for the calendar year 2019 period. The webinar will provide a general overview of the Occupational Mix Survey with a purpose to provide the attendees with the following:

- The importance of the Occupational Mix Survey and its implications on wage index
- Overview of the Occupational Mix Adjustment factor calculation
- Collection of data process and reporting for the specific Occupational Mix categories

Ryan Sader, Senior Manager, Wage Index Services, Toyon Associates

Ryan Leads the Wage Index practice line for the firm which includes preparation of wage index reviews for 75+ hospitals throughout the country annually, Medicare occupational mix survey preparation and submission every three years for multiple hospitals and health system, and filing, coordination and oversight of Medicare geographic reclassifications and rural re-designations.
